

## Information on California Proposition 65

FATH GmbH Components, Gewerbepark Hügelmühle 31, 91174 Spalt

California Proposition 65 requires companies to post or include warnings on or with their products in California indicating significant exposures to chemicals that cause cancer, birth defects or other reproductive harm. Under the law, all substances covered by Proposition 65 must be warned about unless the exposure is low enough not to pose a significant risk.

The list currently contains more than 1,000 chemicals.

To the best of our knowledge, the standard products we supply to our customers do not contain any materials that are subject to these requirements.

The list and further information on California Proposition 65 can be found on the website of the Californian government (<https://www.p65warnings.ca.gov/>) and the California Office of Environmental Health Hazard Assessment (<https://oehha.ca.gov/proposition-65>).
